

GH RAISONI COLLEGE • DEPARTMENT OF BBA-CA • SYBBA-CA (SEM III)

AI CHATBOT FOR COLLEGE — REVISED DIAGRAMS

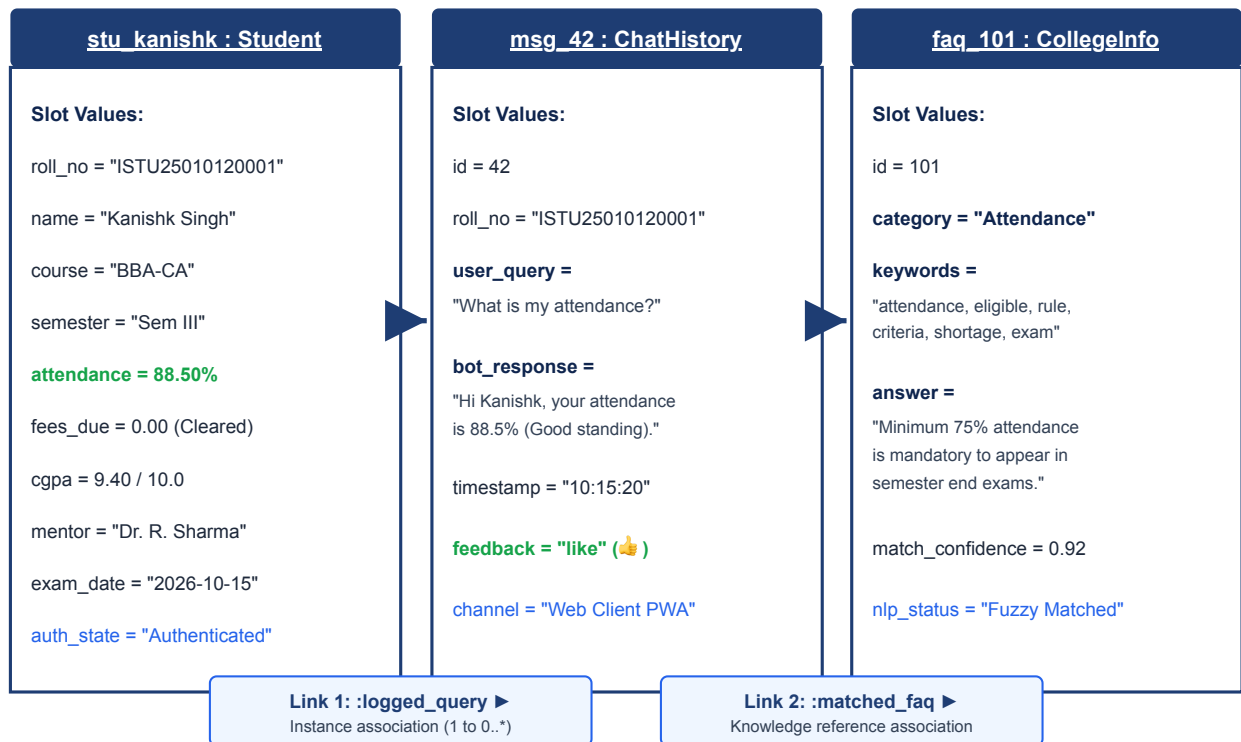

Runtime object memory snapshot

1. Object Diagram (Exactly 3 Boxes)

✓ Teacher Correction Applied: Strictly 3 runtime instance boxes and solid link arrows.

Live Execution Snapshot Scenario (Active Student Transaction):

Student Kanishk Singh asks about personal attendance; ChatHistory logs query #42 matched against CollegeInfo FAQ #101.

✓ Standard UML Object Diagram Specifications Verified:

- Exactly 3 Concrete Runtime Object Instances: <u>Student</u>, <u>ChatHistory</u>, and <u>CollegeInfo</u>.
- Fully populated slot values with actual live strings, numeric metrics (88.5%, CGPA 9.40), and timestamps.
- 100% Solid Directional Association Arrows between instances (zero dashed lines).

Fig: Object Diagram — exactly 3 runtime instances with concrete slots and solid arrows.
