3. Object Diagram (Runtime Instances & Slot Values)

An object diagram using links and 3 objects

An object of class Admin and an object of class Student are linked to an object of class College.

Detailed Object Diagram Breakdown (3 Concrete Instances):

- **Admin Object (Admin 01: Admin):** Models administrator authentication, department role, and active session permissions.
- **College Object (College A: College):** Central institutional node managing student capacity (1200), department quotas, and AI Chatbot.
- **Student Object (Student 3030: Student):** Concrete student instance Kanishk Singh (ISTU25010120001) with 88.5% attendance and CGPA.
- **Link Semantics:** Both Admin and Student are connected via formal binary links to the College entity, representing institutional association.

7. Entity-Relationship Diagram (ERD — Database Architecture)

✓ Standard Entity-Relationship Diagram Flow Summary:

- **Exact Square Entity Symbols:** All entities (STUDENT, ADMIN_USER, CHAT_HISTORY, COLLEGE_INFO) rendered as square boxes.
- **Left-to-Right Primary Data Flow:** STUDENT [1] submits [N] CHAT_HISTORY, which answers [N:1] from COLLEGE_INFO.
- **Top-to-Bottom Admin Control Flow:** ADMIN_USER [1] audits [M] CHAT_HISTORY and manages [M] COLLEGE_INFO FAQs.
- **Relational Integrity:** Primary Keys underlined (<u>roll_no</u>, <u>id</u>, <u>username</u>); Foreign Key marked (roll_no FK).

Fig 7: Entity-Relationship Diagram (ERD) — structured left-to-right relational flow using square entity symbols (STUDENT, ADMIN_USER, CHAT_HISTORY, COLLEGE_INFO) with cardinalities and non-crossing attributes.

8. Deployment Diagram (Hosting Topology & Artifact Architecture)

deployment Development Environment Model

Development Environment Model

UML Deployment Architecture Legend & Mapping:

- **:Ethernet Hub:** Central network routing gateway connecting client and cloud server hardware nodes.
- **3D Nodes (DEV001 & DEV002):** Physical/virtual hardware devices with CPU, RAM, and Disk controller specifications.
- **«deploy» & Resides:** Formal deployment relationships indicating software execution runtime and resident artifacts.

Fig 8: Deployment Diagram — Development Environment Model with :Ethernet Hub, 3D hardware nodes with specifications, «deploy» dependency arrows, and resident software component boxes.
